WORK EXPERIENCE

Plom, UBC — *Software Developer*

Feb 2021 - Aug 2021

Assisted in coding for Plom, a free paperless marking program for instructors. Helped fix and catch errors for a server-client relationship. Coded in Python, and project managed through Gitlab.

PROJECTS

Weather Tracking App — *Android Studio*

An android app created with Android Studio that displays whether an umbrella will be required for the day. Weather data JSON is extracted then parsed with Google's GSON API.

On-Screen Text Presenter — *Java/NodeJS*

A Java application that takes in Discord messages parsed with a NodeJS application, and scrolls them across the screen. Useful for streaming and video-making purposes.

Personal Website — *HTML/CSS/Javascript*

A personal website to show off some HTML components.

VOLUNTEER EXPERIENCE

Career Fair, UBC — *Volunteer Assistant*

Jan 2020

Helped set up booths, and provided assistance to 800+ students and 40+ employers at the event. Held a flexible role to fill any roles needed.
